The theatrical season at the Park will be inaugurated tomorrow afternoon, when the Two Johns Comedy Company will open a week's engagement at that house. The Two Johns have been seen here several times before, and need no special introduction to the public. Their performance has no particular dramatic merit, but is full of fun, music, dancing, pleasing and sprightly speciality features, and is clean and wholesome. Mrs. Stewart, the dresser, who assumes the leading characters, are good comedians, and their company is, no doubt, equal to the requirements of the place. They should do a very big business. The house in the interior of the building were completed last night, and the house now presents a very handsome appearance. It will compare favorably with any other house in the city. John T. Dickson will be the active manager.

Stage Gossip.

Miss Nellie Henry has bought a fruit farm in southern California.

John A. Stevens is in London, loaded with manuscript plays, which he is trying to sell in the British provinces.

The second tour of the Edwin Booth-Lorraine Barrett combination will begin in the West, probably on Sept. 17.

Joseph Wheelock is to create the part of the roving and manly Tom Barrett in "Philip Herve" at its forthcoming Fifth-avenue production.

Charles P. Hall entered upon the management of the Sacramento houses with a boom, Fanny Davenport's engagement, which was the opening production, turned hands away at every performance.

The encroachment of amateurs upon the already over-crowded ranks of actual and "alleged" actors is reaching formidable proportions. All prominent managers are constantly besieged with applications from aspiring candidates for histrionic honors.

Harry Hawk, who has been engaged to play the leading comedy part in "The Stowaway," is pretty well off for an actor. About five years ago he came to Indianapolis, and was in the suburbs of Minneapolis for \$100. He has recently refused \$10,000 for the same role.

The Northern Pacific railroad is now a great household of choice from the election excitement, and a number of first-class companies play "On that route between now and November election, James and Wainwright and Nat Goodwin being among the "pioneers," giving the best in comedy and tragedy that has yet been seen in that country.

Lotta is at Lenox, Mass. Her next tour will begin Sept. 6 in Milwaukee. Her company will include Jules Deshayes, a French actor, Gymnase in Paris; George C. Boniface, Jr., Charles Harris, J. W. Hume, and Misses Genevieve Reynolds, Helen Leslie and Hattie Starr. Mr. Jack St. Maur continues as the manager.

Mr. William Gillette's new play, "A Legal Wreck," was produced at the Madison-square Theater on Tuesday, and was well received. It was pretty much the same as the production was carefully done. The bit of the evening was made by Mr. Sidney Drew, a young son of the well-known Drew family, and if the comedy has a run—which it may have—it will be owing to him.

The applause which greeted the first scene during the third act of "The Still Alarm," at the Princess's Theater, London, Aug. 2, was the most enthusiastic and longest ever heard within the walls of the house. At the end of the play, actors, author, horses, dog, engine, Joseph Arthur, Harry Lacy, William Wallace Kelly, and Miss Grace Hawthorne, were enthusiastically called before the curtain to receive popular ovations. "The Still Alarm" is a big success in London.

Kate Castellan has a mania for "dog collecting." The fact is an entirely new one in theatrical circles. In the kennel at her home in Oakland, Cal., there is a collection which is pitched up in the top circles of canine aristocracy. A lot of pairs of eyes, ears, and every other part of doggie has received the stamp of aesthetic and fashion. One of the number, a handsome St. Bernard, which belongs to her husband, Harry Phillips, weighs over 400 pounds, and is valued at \$2,000.

Lawrence Barrett is believed to be the most carefully and best-dressed actor on the American stage. Mr. Charles Hawthorne, who designs and manufactures all of this star's wardrobe, has carte blanche on every order given him, and is called upon to furnish costumes not only historically correct, harmonious in color, and faultless in make, but rich and expensive in quality. The costumes now being made for him for his forthcoming revivals of "Othello" and "The Merchant of Venice" are particularly elaborate, and will be the most elaborate and expensive ever worn by an American actor.

The Cesar's Dinner to the Kaiser.

The most splendid entertainment which was given at Peterhof during the visit of the Emperor William was the state dinner on Sunday week, which took place at 7 o'clock, and 190 covers were laid. There were 5,000 roses on the table and the plates, spoons, dishes and covers were of solid gold. The Emperor William, who sat between the Cesar and the Czarina, had his place adorned with corn-flowers, and after dinner the company adjourned to the terrace, and there was a wonderful display of fireworks from Mon-Plaisir, one of the numerous chateaux in the park. The dinner was given in the Hall of Peter the Great, which is adorned by some of the finest tapestry in the world, representing a naval battle under Count Orloff, and also Peter the Great, who, in person, Catherine and Elizabeth sailing on the lake of Ladoga. The enormous chandeliers in this hall were made for Peter, and they are

perb. The Hall of Standards was furnished with yellow satin, and splendidly decorated with the hall of Catherine, the walls of which are covered by nearly four hundred portraits of the most beautiful Russian women of her reign. Prince Henry of Prussia, was quartered at a chateau in the park, which was formerly the residence of the Grand Duke Michael Pavlovich, the younger brother of Nicholas, and he was frequently in conversation with his sister-in-law, the Grand Duchess Elizabeth Fedorovna.

THE APARTMENT PRESCRIBED.

Strange Cure of a Young Woman Dying from Mysterious Disease.

Findlay (O. Special).

A young daughter of Henry Searfoss, a well-known farmer of Marion township, for a month past had been very sick, her ailment being one not described in medical books, and exceedingly mysterious. The cause of her illness was unknown, and the symptoms developed rapidly. At frequent intervals her flesh became cold, and green spots appear, covering nearly her entire person.

On Monday of last week the patient lost consciousness, and for thirty-six hours lay in a trance, the warmth of her body only assuring the fact that life still remained. Tuesday night she awoke to consciousness and told a strange story. In her trance a man had made her appearance, and with a buggy-wheel had shown her how her injuries had come about, revealing to her that the circumstances were literally correct. He next brought a sheet, a bucket of water and three bottles containing wine, whisky and alcohol, and explained how these might be used to effect her cure. If they were not used he warned her that at 7 o'clock on the morning of the next day she would begin failing, and at 4 o'clock in the afternoon death's approach would be realized, and that at 9 o'clock the next morning the young lady would be dead.

The family physician, when sent for, made light of what he thought was a delusion and empty dream, and the remedy indicated by the apparition was not at once applied. The predictions of the vision, however, began to come true, and the girl was getting rapidly worse, when the frightened parents hastened to apply the remedy prescribed, only to find an immediate change for the better, followed by steady improvement. Yesterday Miss Searfoss was able to be up and around, and she is now nearly as well as ever.

The affair has caused much speculation in the neighborhood regarding the value of the spirit-prescription as a means of restoring the young lady to health and natural vigor.

THE LICK TELESCOPE.

More Hints of Wonderful Discoveries Already Made.

San Francisco Bulletin.

Prof. George Davidson, of the United States Geographical Survey, accompanied by several friends, visited the Lick Observatory, on Mount Hamilton, Saturday evening, by invitation of Prof. Holden. The night was a splendid one for observations, but owing to the fact that 117 persons were also on the mountain, it being visitors' night, no length of time could be spent at the great telescope, as that is always the great attraction for visitors. It was the first time through the 36-inch refractor that Prof. Davidson had enjoyed since the completion of the observatory, and to say that he was pleased with the experience is only half putting it. "Yes, yes," he said to us, "when spoken of about the matter, 'it is the greatest and greatest instrument on earth. I am not at liberty to divulge just now what I saw and what has already been accomplished by the astronomer on Mount Hamilton. The story is long, and I cannot tell you all of it.
